Include all seed mixes and application rates or a list of all native plants to be planted at the site.

Seed Mix and Application Rate, or List of Native Plant Species:

Weed Management

Describe how noxious weeds will be prevented or controlled following construction:

Revegetation Requirements

Missoula County reserves the right to inspect revegetation sites and require corrective actions if vegetation establishment or weed management standards are not met at least one year following completion of work.

The permittee agrees to:

- ☐ Complete revegetation no later than the first fall seeding season following disturbance. For projects extending beyond one construction season, all completed disturbance areas shall be revegetated no later than fall of each year.
- ☐ Control Montana-listed noxious weeds and nuisance weeds within disturbed areas.
- ☐ Repair revegetation failures as needed.
- ☐ Notify Missoula County when seeding or revegetation is finished by emailing photos of completed work.

Landowner/Responsible Party Agreement

The signed plan constitutes a binding agreement between Missoula County and the responsible person or agency
